

Prosit 1

Recently recruited as an engineer within the company "ESPRIT TECH", you have directly integrated a team of developers whose mission is to develop programs written in the JAVA language.

You and your team have been asked to create a software program to digitize the management of a zoo.

To do this, you are asked to follow the instructions of your project manager.

Instruction 1 :

- Create the "ZooManagement" class
- Make this class a main class
- Declare an integer nbrCages (initialized to 20) and a String zooName (initialized to "my zoo")
- Display the message composed of the two variables.
Example: "my zoo has 20 cages".

Instruction 2 :

You're asked to modify the JAVA code to allow the user to enter the number of cages and the name of the zoo to be managed via the keyboard.

(Hint: Scanner)

ps: Make sure the user enters data correctly.

Instruction 3 :

Display changes.
